

# Best Dual Certification Programmes for **Full Stack Data Science**

Certificates Awarded by UTM, IBM & 360DigiTMG

## Duration

Executive Program - 9 Months  
Professional Diploma - 12 Months

Mode : Blended  
Classroom & Virtual

# Eligibility Criteria

## Executive Program

- ✓ College degree in STEM related fields.  
Science / Statistics / Mathematics / IT /  
Physics / Software Technology & Business
- ✓ No programming knowledge needed
- ✓ 40% score in eligibility test

## Professional Diploma

- ✓ Age: 21 years and above
- ✓ Min 3 years experience in any industry
- ✓ Min SPM / STPM

# Key Features

15+ Live Webinars every month

3 Months Stipend for Freshers & Students

Easy Payment Options Available

Life-Time access to LMS

Personal Mentorship

# 1

 Capstone Project

# Synopsis

This is a 9 to 12 months dual certification programme which is blended training. This includes handling Data related projects end to end, including Data Generation, Data Collection (SQL, NoSQL, Big Data, IoT Sensors, Cloud), Data Cleansing /Preparation to EDA / Descriptive Statistics, Feature Engineering, Feature Extraction, Feature Selection, Model Building, Data Mining Supervised Learning, Unsupervised Learning, Predictive Modeling, Forecasting, Data Optimization, Data Simulation, Deep Learning, Neural Networks, Artificial Intelligence, Data Visualization, Deploying Solution into Production, Data Privacy and Data Security along with devising model maintenance and upgradation strategies. Right from generating to collecting data to analyzing data to visualizing data and finally deploying the data in production alongside maintenance.

# Objective

The Full Stack Data Science Programme equips data professionals with deep conceptual understanding of and hands-on training in all the advanced tools and techniques needed to make data-driven business decisions. The core course modules have been designed to suit different job profiles - data administrators, business analysts, data analysts, data engineers, data architects and data scientists. Students and Working Professionals can also pick from a wide range of elective modules for industry or function-specific data analytics such as fraud analytics, customer analytics or retail analytics.

# Learning Outcomes

Understand end to end implementation of projects in the space of emerging technologies including Industrial IoT sensors to generate, Cloud Computing to store the data, classify on whether data is structured data or unstructured data & store the data appropriately, ensuring that the data is secured from external as well as internal miscreants and many more. Most important applying the best practices of handling the projects using well defined project management methodologies.

Handle Data Science, AI, IoT, Cloud projects using a structured project management methodology

Configure IoT devices to generate data

Store the data on Cloud

Build algorithms using data stored on cloud

Build & deploy AI driven applications

Be able to handle both structured as well as unstructured data

Be able to handle what-if analysis for management decision making

Secure the data & adhere by data privacy norms

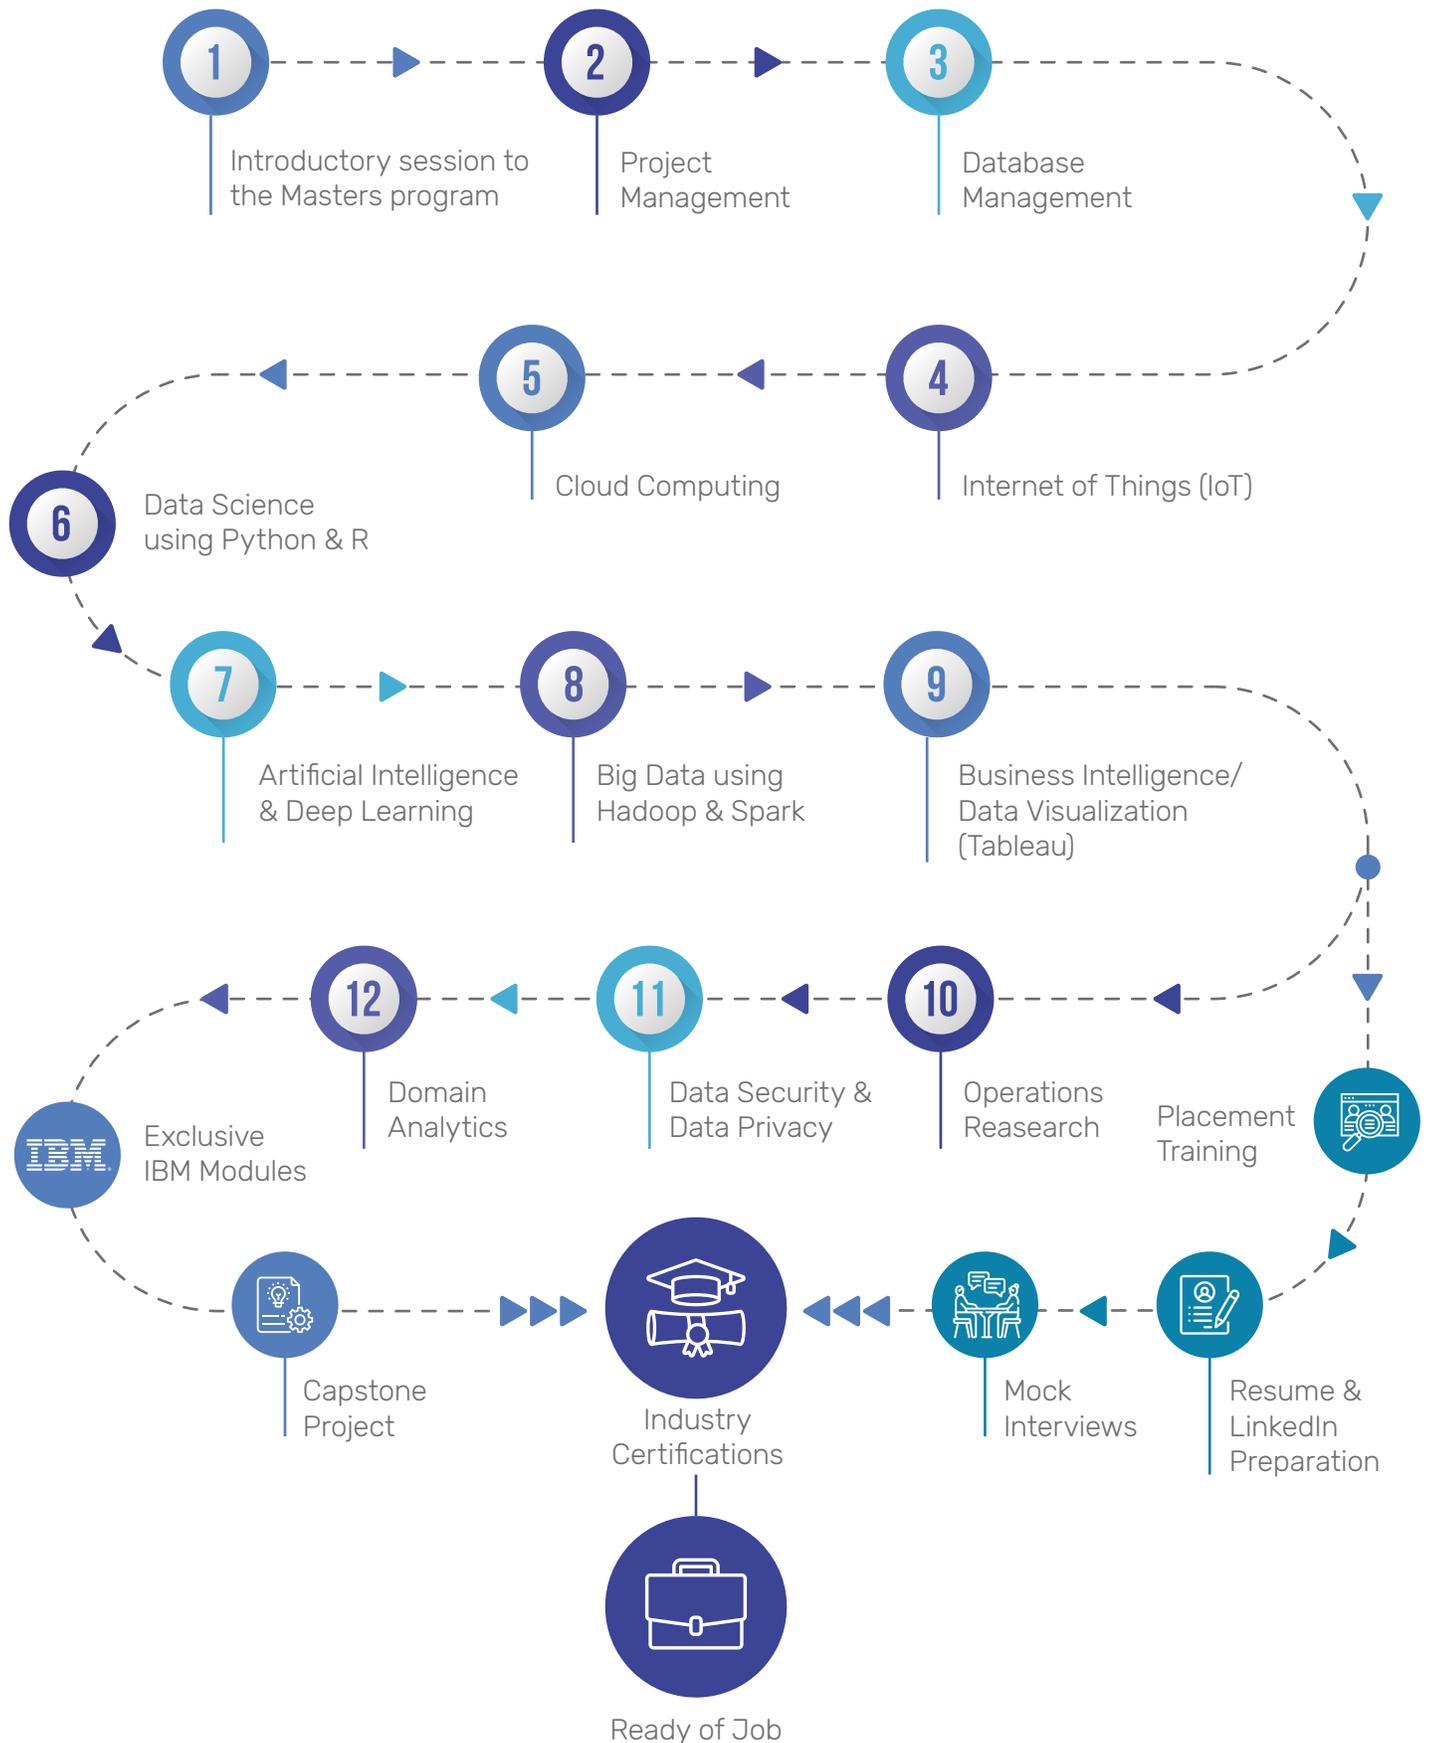

# Comparison Between Professional Diploma and Executive Program in Full Stack Data Science

Program	Executive Program	Professional Diploma
Duration	9 Months	12 Months
EPF Withdrawal	No ❌	Yes ✔️
PTPTPN	NO ❌	NO ❌
HRDF Claimable	Yes ✔️	Yes ✔️
Scholarships (Upto 20%)	Yes ✔️	Yes ✔️
Course Fee Includes	Application fee, Certifications, LMS and Placement training and convocation Fee	Application fee, Certifications, LMS and Placement training and convocation Fee
International Certification	<b>360DigiTMG</b> - Executive program <b>UTM Malaysia</b> - Professional Certificate <b>IBM</b> Course completion	<b>360DigiTMG</b> - Executive program <b>UTM Malaysia</b> - Professional Diploma <b>IBM</b> Course completion
Mode of Training	Blended - Live and Classroom	Blended - Live and Classroom
Course Content & Structure	<a href="#">View Program Brochure</a>	<a href="#">View Program Brochure</a>
Schedule	<a href="#">View Schedule</a>	<a href="#">View Schedule</a>
Life-Time access to LMS	Yes ✔️	Yes ✔️
In Take / Start date	One in Quarter	3 In a year (but you can join in Excutive and continue to Professional Diploma Intake)
Advantages	Fast and cheaper	<ul style="list-style-type: none"> <li>• Woldrs 182<sup>th</sup> rank University Certificate</li> <li>• Eligible for Dual Certificates Executive and Professional Diploma</li> <li>• Malaysians can withdraw EPF money</li> </ul>

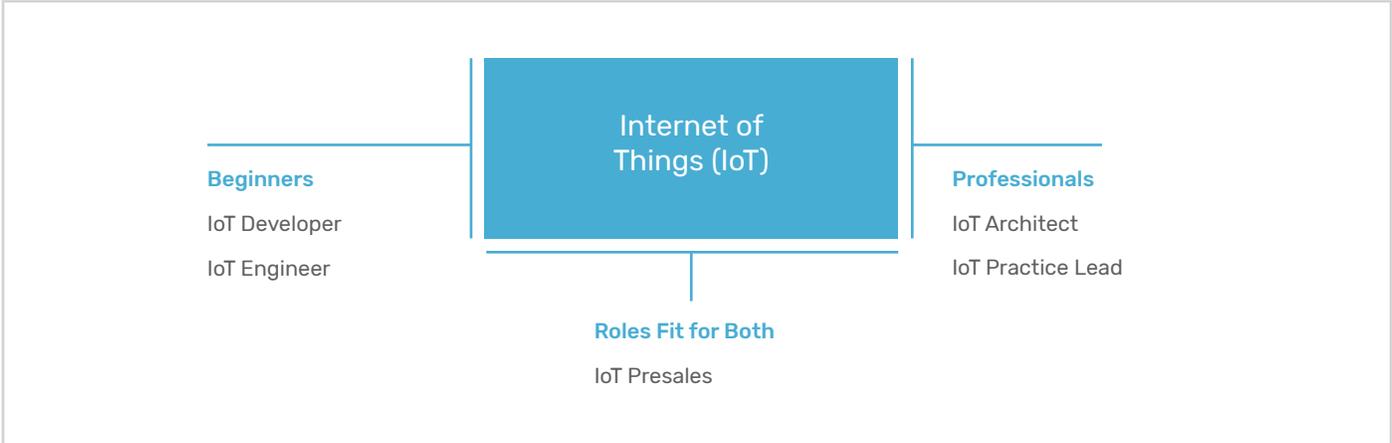

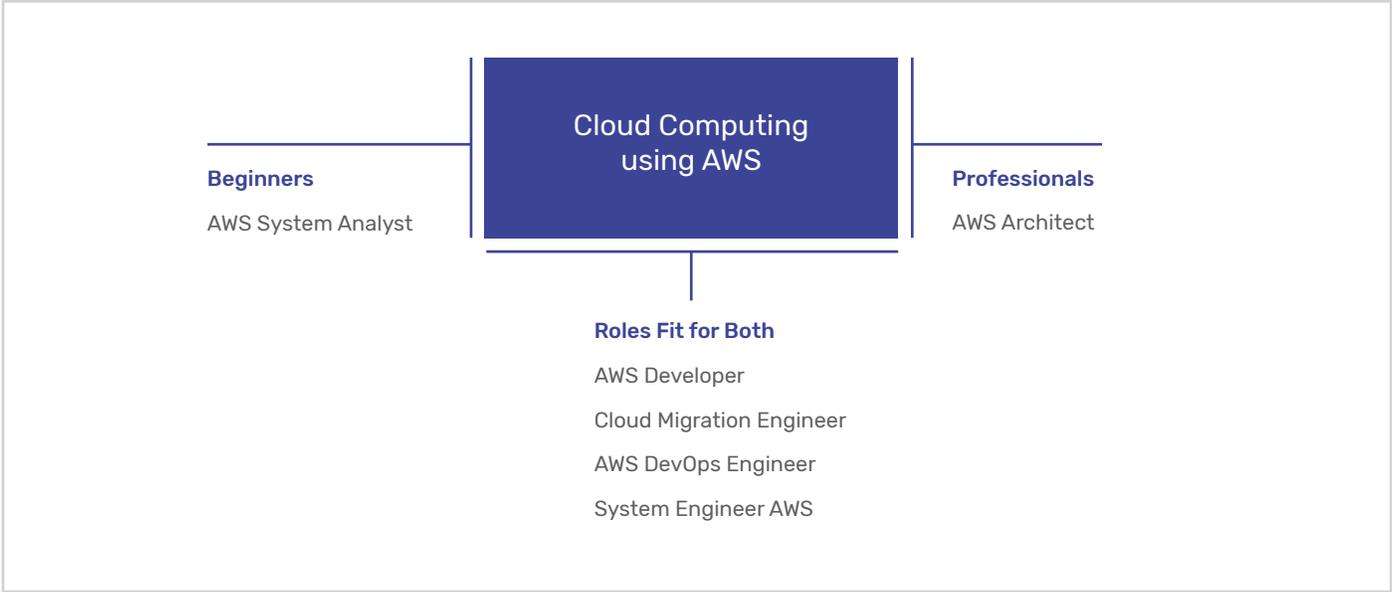

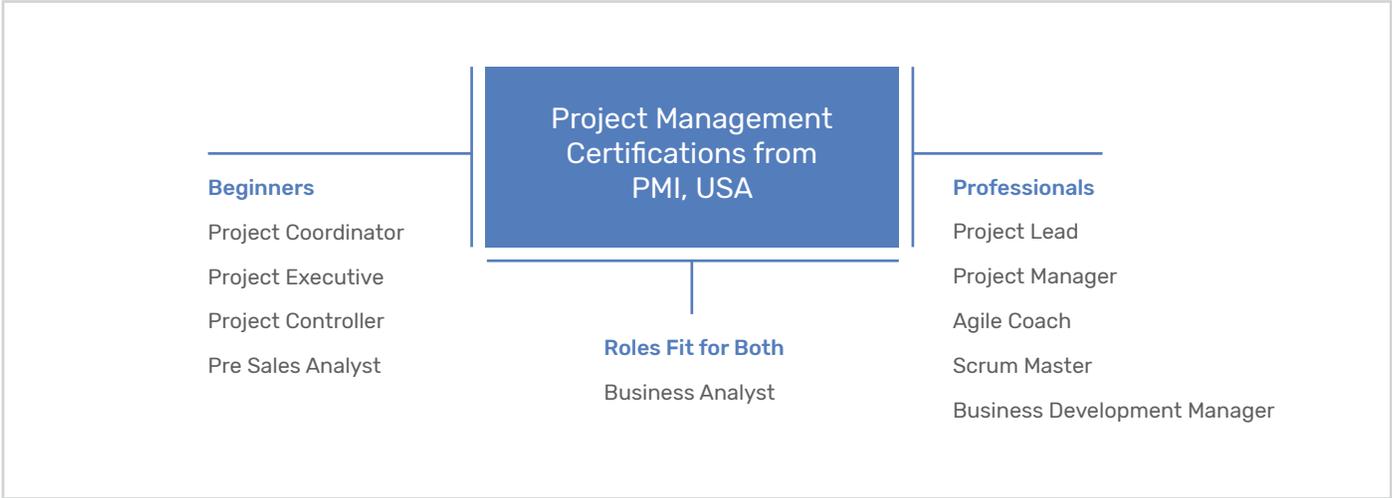

Course Fee	Standard Instalments	Single Shot (10% discounts)	RHB Credit Card holders (20% discounts)
<b>Executive Program</b> <b>RM 18000</b>	RM 2000 per month - 9 months	RM 16200 One Shot	RM 1200 per month - 12 months
<b>Prof Diploma</b> <b>RM 23000</b>	RM 2555.55 per month - 9 months	RM 20700 One Shot	RM 1533.33 per month - 12 months

Data Security Cloud Consultant

# Course Module and duration

MODULES		DURATION (CONTACT HOURS)	ASSIGNMENT DURATION	PROJECT DURATION
<b>1</b>	<b>Introductory session to the Masters program</b>  Self Paced	4	-	-
<b>2</b>	<b>Project Management</b>  Self Paced	16	-	-
	Agile Certified Practitioner (ACP) <ul style="list-style-type: none"> <li>• Risk communication</li> <li>• Plan risk management</li> <li>• Identifying project risks</li> <li>• Perform qualitative risk analysis</li> <li>• Perform quantitative risk analysis</li> <li>• Plan risk responses</li> <li>• Monitor and control risks</li> <li>• Tips and tricks for the PMI-RMP certification exam</li> </ul>			
<b>3</b>	<b>Database Management</b>  VILT	16	60	60
	SQL for Structured Database <ul style="list-style-type: none"> <li>• Installation Procedure of MySQL.</li> <li>• SQL Languages - DDL, DQL, DML, DCL</li> <li>• Database Normalisation</li> <li>• Primary Key, Foreign Key &amp; Composite Key Core Concepts</li> <li>• Establishing Connection from SQL - R &amp; Python and usage</li> <li>• Import and Export of mass Data in different formats</li> </ul>			

## NoSQL for Unstructured Database

- Introduction to NoSQL
- NoSQL Data Models
- Difference between SQL vs NoSQL
- Column Oriented DataBase
- Different Examples of NoSQL
- Introduction to HBase on HDFS
- HBase Components
- Regions within a RegionServer
- MemStores and HFiles within a Region
- Hands-On

# 4

## Internet of Things (IoT)

VILT

24

-

-

- Introduction to IoT
- IoT development boards
- Data representation and serial communication
- Build an obstacle counter
- Design an IoT device
- IoT protocols
- About the ESP8266 family
- Talkback
- An IoT gateway – Raspberry Pi
- IoT friendly architectures
- IoT Middleware - MQTT, AMQP, CoAP
- Cloud computing with Azure
- Azure IoT hub
- Configure service endpoint on Azure
- Sending data to power business intelligence
- Challenges faced by IoT
- Description: overview of machine learning

# 5

## Cloud Computing

VILT

40

80

80

### Cloud Computing using AWS

- AWS History
- AWS global infrastructure details
- EC2
- Networking and content Delivery
- Storage Services
- Relational Data base Service
- Identity and Access Management
- AWS Route 53
- AWS Monitoring & Notification

### Machine Learning on Cloud

- Introduction to cloud computing and models
- Brief introduction to AWS
- Compute services in AWS - elastic compute cloud
- Storage services offered by AWS
- Security features through identity and access management
- AWS Relational Database Service and Redshift
- Machine learning using Amazon SageMaker
- NLP and text mining using Amazon Comprehend
- Building a prediction model using machine learning service
- Amazon QuickSight

**6**

## Data Science using Python & R

VILT

48

80

80

- Application of Data Science Across Industries, Sectors and Domains
- Project Management Overview of Handling Data Science Projects
- Data Preparation, Data Cleansing, Exploratory Data Analysis
- Feature Engineering, Feature Extraction, Feature Selection
- Hypothesis Testing, Regression Techniques
- Predictive Modelling Using Advanced Regression Techniques
- Data Mining Unsupervised - Clustering, Association Rules etc.
- Text Mining, Natural Language Processing
- Data Mining Supervised/Machine Learning Algorithms
- Black Box Techniques – Neural Networks, SVM etc.
- Time Series Analysis/Forecasting

**7**

## Artificial Intelligence & Deep Learning

VILT

24

60

60

- Introduction to AI and Deep Learning
- Introduction to Python Libraries - Keras, Tensorflow, Opencv
- Perceptron Algorithm, Back Propagation Algorithm
- Artificial Neural Network, Multilayer Perceptron
- Convolution Neural Network
- Image Processing and Computer Vision
- Recurrent Neural Network
- Long Short Term Memory
- Gated Recurrent Unit
- Autoencoder, Restricted Boltzmann Machines
- Deep Belief Networks
- Generative Adversarial Networks
- Reinforcement Learning and q-learning

**8****Big Data using Hadoop & Spark**

Self Paced

24

-

-

- Introduction to Hadoop and Hadoop framework
- Introduction to Linux and installation of Hadoop
- Hadoop Distributed File System
- MapReduce
- Pig Programmes
- Hive Programmes
- HBase for storing data
- Practical applications of Sqoop
- Spark and associated ecosystem

**9****Business Intelligence/ Data Visualization (Tableau)**

VILT

24

60

60

- Data visualisation - introduction and concepts
- Tableau - introduction and architecture
- Exploring data using Tableau
- Working with data using Tableau including data extraction and blending
- Charts in Tableau
- Tableau filtering
- Tableau groups, sets, calculations, LOD expressions
- Tableau mapping features
- Tableau dashboard and story

**10****Operations Research**

Self Paced

24

-

-

**Data Optimization**

- Introduction to applications of Data Optimization
- Formulating Linear Programming Models
- Solving Linear Programming problems using Graphical as well as Simplex methods

- Resource-Allocation problems
- Cost-Benefit-Trade-Off problems
- Economics of Duality
- Sensitivity Analysis
- Transportation, Transshipment, Shortest Path problems
- Maximal Flow, Minimal Spanning Tree problems
- Location problems and Portfolio Optimization

### Data Simulation

- Introduction to applications of Data Simulation
- Types of probability distributions and Random number generators
- Monte Carlo Simulation, Hedging with PUT option, Cash Flows
- Techniques for generation of Random Variates
- Forecasting the Prices
- Demand Estimation
- Sell, Abandon, Switch, Expand options
- Discrete Event Simulation – Single Queuing System
- Queuing Theory – Transient and Stationary phases

**11**

## Data Security & Data Privacy

Self Paced

24

-

-

- Overview of Data Security
- Information Security
- Managing Risks
- Protecting and Securing Data
- Protecting and Securing Information
- Certifications of Data Security

**12**

## Domain Analytics

Self Paced

16

40

40

There are 16 modules. 2 modules can be chosen from these 16 modules.

# Exclusive Course Module from IBM

- Introduction to Data Science
- Machine Learning with Python
- Big Data 101
- IBM Cloud Essentials
- Build Swift Mobile Apps with Watson AI Services
- Data Privacy Fundamentals

## Our Panel of Coaches

**Bharani Kumar Depuru**

Director - Innodatatics Inc., USA  
Digital Transformation  
Industrial Revolution 4.0 Implementer

**Sharat Kumar Manikonda**

Vice President Analytics  
360DigiTMG & Innodatatics., USA  
Data Scientist - Research in Analytics,  
Big Data, Deep learning

**Dr. Nitin Mishra**

Data Scientist,  
Senior Consultant, Change  
management

**Bhargavi Kandukuri**

Senior Tableau Developer  
Innodatatics Inc., USA

**S Swaroop**

Director - 360DigiTMG, USA  
Data Science | Artificial Intelligence

**M V S Prasad**

Certified Cloud Solution Architect  
DataScientist - 360DigiTMG &  
Innodatatics Inc., USA

# Select an elective module and add more value to your profile

## Function-Centric Modules (16 hours)

MODULES	DURATION (CONTACT HOURS)	ASSIGNMENT DURATION	PROJECT DURATION	CAPABILITIES INCLUDE (NOT AN EXHAUSTIVE LIST)
Supply Chain Analytics	16	40	40	Planning optimisation, sourcing decision-making, manufacturing optimisation, distribution and order fulfilment
Fraud Analytics	16	40	40	Spam detection, fraud prevention, loan default prediction
Social Media and Web Analytics	16	40	40	Tracking of buyer journey, customer sentiment analysis, social engagement analysis and monitoring
Marketing Analytics	16	40	40	Marketing mix modelling, competitor analysis, pricing analysis, demand forecasting
Customer Analytics	16	40	40	Buyer behaviour prediction, customer segmentation, voice of the customer study
HR Analytics	16	40	40	Employee churn prediction, workforce planning, top talent identification
Accounting / Internal Auditors Analytics	16	40	40	Financial planning and forecasting, fraud detection, trends analysis, risk assessment
Cyber Security Analytics	16	40	40	Threat intelligence, network, endpoint & cloud data analysis, behavioural modeling, compliance monitoring

## Industry Domain-specific Modules (16 hours)

MODULES	DURATION (CONTACT HOURS)	ASSIGNMENT DURATION	PROJECT DURATION	CAPABILITIES INCLUDE (NOT AN EXHAUSTIVE LIST)
Financial Analytics	16	40	40	Personalisation of banking, customer segmentation, customer risk scoring
Retail Analytics	16	40	40	Customer trends analysis, inventory planning, loyalty programme management, category management
Sports Analytics	16	40	40	Strategy formation, optimisation of exercise programmes, brand engagement
Oil & Gas Analytics	16	40	40	Production optimisation, asset management, failure and bottleneck prediction
Telecommunication Analytics	16	40	40	Operational efficiency, risk management, fraud prevention
Manufacturing Analytics	16	40	40	Supply chain optimisation, quality management, predictive maintenance
Health Care Analytics	16	40	40	Hospital operational efficiency, health risk identification, accuracy of treatment protocols
Automotive Analytics	16	40	40	Inventory and supply chain logistics, production planning, demand forecasting, cost optimisation

# Industry Placement Training

Life Time Access to LMS

100% Placement Assurance

Live Free Webinars

Complimentary Courses

Resume and LinkedIn Review Sessions

Unlimited Mock Interview and Quiz Session

Offline Hiring Events

Networking Sessions

RM 500/M Stipend for 3 months for performing candidates (Conditions Apply)

Personalised Industry Mentorship

## Live Projects in Support with

# International Certificate

Our program comes with globally recognized University Technology Malaysia (UTM) at course level to showcase your knowledge and skills in Data Science. Get Certified by IBM and UTM, Malaysia

Certificate ID Number: 5ee4323e675468f9ee48164b48ac32

March 15, 2020

Professional Certification in Data Science & AI  
Certificate from UTM, Malaysia

## Earn These Complimentary Certifications\*

		
Tableau Desktop Certified Specialist	TUV SUD Certified Data Scientist	Lean Six Sigma Green Belt (TUV SUD)

\* Conditions Apply - Not Applicable if taken in Discounts

## Opt for These Additional Certifications

			
AWS Cloud Practitioner	Project Management Professional (PMP)®	CAPM® from PMI	CCA Spark & Hadoop Developer
			
CCA Data Analyst	AWS Solution Architect	Tableau Desktop Certified Associate	ISO 27001 Lead Implementer

# Our Alumni Work At

Lee Cheong Loong

## Industry Trends

3+Years Experience on  
"Data Sciences" can easily  
fetch salary up to

**RM 180K**

Average Hike for "Data  
Scientist" stands at

**34% to 50%**

## HRDF Claimable

HRDF Approved Training Provider (MyCoID 1265527-M). Full Stack Data Scientist course is HRDF claimable for employees of companies who are registered with HRDF. Kindly check with your company HR department to confirm. You can contact our coordinators about the benefits available to you.

### Note:

- This curriculum is subject to change based on inputs from Industry and Innodatatics Inc, USA;
- All Capstone & Assignment Durations are estimated based on an Average student pace & speed;
- For details schedule break up, please contact respective learning centers in your location
- All Contact hours schedules are available in both classroom and Live Online Training

Employee Provident Fund ( EPF) can we withdrawn from the ACCOUNT II to pay the course fee.

Before applying for withdrawal under this scheme, EPF members are required to check the balance in Account II and obtain an offer letter from us.

Have questions about how it fits in with your career goals?
